

# ITALIAN

TERM TWO

2026

## Foundation

This term, our Foundation students will embark on an exciting journey into the Italian language. They will explore colours, develop their counting skills, and be introduced to the classic Italian story *Pinocchio*.

As part of their learning, they will also begin to recognise and name different parts of the body in Italian through songs, stories and interactive activities.

## Years 1 to 6

This term, students in Years 1–6 will be learning Italian through the engaging theme of food. They will explore key ingredients used in Italian cooking as well as the steps involved in making traditional dishes such as bolognese sauce and homemade pasta.

Students will develop their Italian language skills by learning new vocabulary, following instructions, and expressing their likes and dislikes about food. Songs will also support learning, helping students remember key words and phrases in a fun and interactive way.

This unit will also provide a foundation for our whole-school Italian incursion in Term 4, where students will have the opportunity to further extend their language learning in an authentic and immersive setting.
